

Attack Surface Management for Small Business

Attackers aren't picky—**small and medium-sized businesses (SMBs)** are just as vulnerable to cybersecurity threats as larger enterprises. With ransomware and other cyber attacks becoming increasingly lucrative, the number one attack vector remains internet-exposed assets. However, many SMBs lack the resources to effectively manage and secure their digital footprint.

Censys ASM offers an SMB-specific solution that simplifies attack surface management with zero hardware requirements and quick, easy implementation done in minutes. It empowers you to detect, identify, and prioritize risks across your entire internet-facing asset landscape, all without needing a large security team.

Core Use Cases

Continuous Asset Discovery

Ransomware Mitigation

Misconfigured Service Detection

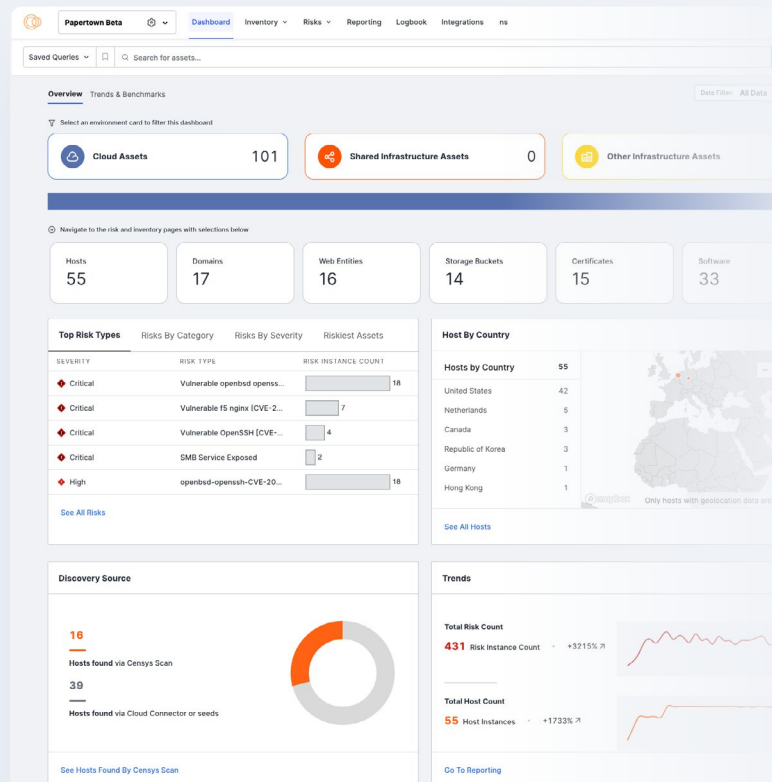

M&A Risk Assessment

CVE Rapid Response

Security & Framework Compliance

Key Features

Weekly Attack Surface Scans

At no additional charge, uncover and prioritize vulnerabilities across your digital ecosystem 52x per year.

Alerts on New & Changing Risks

Get notifications when new vulnerabilities or changes in your attack surface are detected, so you can act quickly.

Cloud Exposure Discovery

Mitigate the risk of unauthorized access and data breaches by continuously discovering and monitoring cloud environments for critical exposures and misconfigurations.

Quarterly Benchmarking Reports

Strengthen your security strategy with comprehensive quarterly reports, offering valuable insights and deeper analysis into the effectiveness of your program.

Seamless Integrations

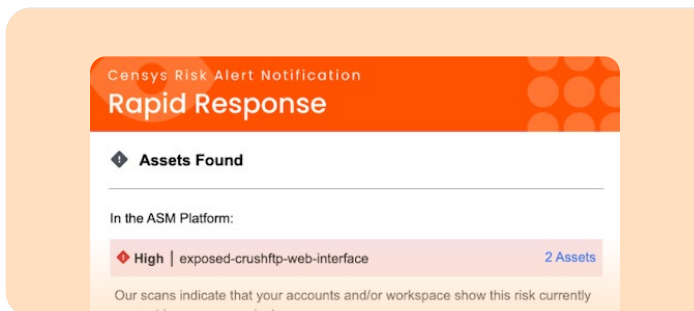

Easily integrate Censys ASM with your existing security tools and workflows, including SIEM, SOAR, and ticketing systems, to streamline security operations.

Censys Academy

Access training and resources designed to help your team maximize the benefits of Censys ASM and stay ahead of the latest security trends.

Rapid Response

Leverage our extensive Internet Map dataset to monitor and track at-risk and exposed assets. Simplify vulnerability prioritization and remediation with CVE detection, accompanied by EPSS and KEV metrics.

Get Started Today

Are you ready to take control of your attack surface and safeguard your business from cyber threats? Discover how Censys ASM can transform your security posture and give you the peace of mind you need to focus on growing your business.
