The Censys Technology Alliance Program

The **Censys Technology Alliance Program** offers companies a unique opportunity to deliver innovative cybersecurity solutions that address the evolving threat landscape. By joining forces, we can enable organizations to strengthen their security defenses and effectively mitigate cyber risks.

Empowering Users with Unmatched Intelligence

Born out of the ZMAP project, Censys is making the internet a safer place. We leverage our proprietary, real-time Internet Map to enable users to discover, monitor, and analyze security exposures and attacker infrastructure.

With Censys data, you can answer questions like:

- How many HTTP vs HTTPS services are on the internet right now? What about 5 years ago?
- Is there internet connectivity after a natural or manmade disaster?
- What are the top 1,000 software products in Russia?
- What's the connection between ESXiArgs and Cheerscrypt?
- Is my organization exposed to today's zero-day announcement?

Censys Differentiators

Censys is trusted by security teams around the world because we uniquely have:

- **The largest scanning infrastructure in the world** - We see more of the internet than anyone.
- **The largest certificate repository in the world** - We have 10B+ certs and counting.
- **1,000+ points of data on each host and certificate** - See JARM fingerprints, ransomware notes, and more.
- **7+ years of history on internet data** - Analyze trends back to their origins.
- **Nonstandard protocol and port scanning** - Did you know that 60% of services are on non-standard ports? We scan these, too.

Strengthening Cybersecurity with Censys

By partnering with Censys, companies can enrich their customers' investments with comprehensive insights into global asset inventory, vulnerabilities, and exposures. Collaborating within the Technical Alliances Program also opens up opportunities for joint marketing initiatives, thought leadership activities, and technical support, ultimately driving innovation and visibility within the cybersecurity ecosystem.

Program Benefits

- **Integration Marketplace** - Gain visibility with placement in the [Censys Integrations Marketplace](#) and improve customer adoption with a pre-built integration.
- **Technical Support** - Receive dedicated technical resources to facilitate integration efforts, ensuring smooth interoperability between Censys and partner platforms.
- **Go-to-Market Opportunities** - Collaborate on joint marketing initiatives to increase visibility and awareness of integrated solutions, reaching a broader audience of potential customers.
- **Thought Leadership** - Participate in thought leadership activities, such as webinars, whitepapers, or speaking engagements, to showcase your industry expertise and innovative approaches.
